React, HTML/CSS, Javascript, Astro, AdminJS, TypeScript, Vue

Backend Development

Intermediate

Blazor, NestJS, C#, .NET

Relational Databases

SQLite, SQL Server, PostgreSQL

Languages

English

C1

German

B1

I am a highly motivated Full Stack Developer, continually striving to improve and learn from my colleagues and new environments. With a strong foundation in both front-end and back-end technologies, I am dedicated to assisting others and enhancing the work environment I am a part of. Also a really social person making me appreciate spontaneous get-togethers and group activities.

Experience

Enterwell **(August 07, 23 - Present)**

Full-Stack developer

- Development of a comprehensive IoT Device Management System, integrating React and .NET for a dynamic user interface including user management with roles and profile handling.

Space Inch **(December 21, 2021 - August 07, 2023)**

Full-Stack developer

- Development of a platform connected to unemployment claim management based on .NET, Blazor and SQL while using Hangfire for background job processing
- Experience in developing a fintech application based on React, NestJS and PostgreSQL

C&I Data Soultions **(January 01, 2021 - December 21, 2021)**

Web developer

- Development of a Vanilla JavaScript project integrated with the Azure Blob API for user management.
- Internal product development of a platform enabling "traffic" sharing through distributed nodes located in various areas of a city, leveraging React, TypeScript and REST APIs.
- Writing PySpark scripts for data processing, with S3 buckets used for data storage.

Infranet razvoj **(September 20, 2017 - January 18, 2018)**

.NET developer

- Development of a platform for mapping package travel routes with the use of Angular, .NET, Entity Framework and SQL

Span **(June 07, 2017 - September 15, 2017)**
